ROBERT PYLE, President

ANTOINETTE WINTZER, Vice President

From War-Stricken Europe QUEEN OF WINTER-FLOWERING BULBS

Six years ago this summer, and three years before the outbreak of the world war, while traveling through Europe, our President, Robert Pyle, had the privilege of inspecting many establishments in which were growing some of the choicest plant collections in the world. Among the multitude of noteworthy plant novelties were these wonderful Amaryllis, mammoth in size, colors glorified to intensity, impressive beyond description. Our friend, E. Gurney Hill, of Richmond, Indiana, a year later succeeded in securing some valuable seed from this wonderful strain which, through the U. S. A. Department of Agriculture, came into our hands. We grew them into blooming size—a limited number to be sure, varied most interestingly as to color combination, but every one ready to produce for you on each stem 2 to 4 huge flowers 8 to 12 inches across and of such brilliant colors as both to dazzle and delight you.

Fruits for Wartime—For Indoor Winter Growing

The Great American Wonder Lemon ➤

American Wonder Lemon (1/3 size)

Will bear flowers and fruit in any ordinary living-room. Fruits are immense. Equal to three or four ordinary Lemons

This is one of the grandest fruits for house culture ever introduced. The flowers are pure, waxy white, very sweet and like orange blossoms; the leaves are thick, glossy green, and shine as if varnished.

Nice mailing plants, 20 cts. each; larger size, 25 cts. each, postpaid; 2-year fruiting size, 50 cts., 75 cts. and \$1 each, by express.

Otaheite Orange

Has thick, glossy green leaves and deliciously sweet, pure white flowers. It begins fruiting while quite young, and bears flowers and lovely, golden yellow Oranges on the same plant at the same time. Fine plants, 25 cts. and 35 cts. each, postpaid; 50 cts. each, by express.

Genuine Fruiting Fig (*Ficus Carica*)

We ship growing plants, from pots, which will keep growing all winter. The fruits grow like a branch from the side of the shoot, and are produced on the young wood. This Fig is a native of Smyrna, and can be grown outdoors in the South, where it will fruit abundantly. The leaves are large, of heavy texture, and ornamental, making a good decorative plant for indoors. 40 cts. each, postpaid; larger size, 75 cts. each, by express.

ROSE SPECIALIST FOR 50 YEARS

Such indeed is Antoine Wintzer, our Vice-President and Superintendent. Mark Sullivan, now Editor of *Collier's Weekly*, formerly a West Grove school boy, last year said of Mr. Wintzer:

"I often think some especial honor ought to be paid to him. You are no doubt familiar with the proverb that the man who excels in his art shall stand before kings—not just those words, but containing that thought. Mr. Wintzer excels in his art. He brought to West Grove the business of raising flowers, and it has become the chief industry of the town. A man of that kind always commands admiration and respect, and, in the words of the proverb, shall stand before kings."

Dr. W. Van Fleet, of the Department of Agriculture, widely famous as a hybridizer of American roses, recently remarked: "Since the loss by death to the Arnold Arboretum, near Boston, of Jackson Dawson, Antoine Wintzer, of West Grove, Pa., is without doubt the ablest American propagator of plants."

Mr. Wintzer is still at the helm, and continues to oversee the growing of thousands upon thousands of roses which for so many years have been going out from West Grove to beautify every corner of our great country.

To grow good plants requires skill.

By past achievements judge future performance.

Quality always counts.

Yours for service,

The Rose, Dr. W. Van Fleet, I got of you last year is the admiration of the whole community.—MR. C. S. M., Westfield, Ill.

★ Mary Lovett, White

Originated by Dr. Van Fleet

A really good, pure white, hardy climbing Rose has long been needed, and this is precisely what we have in the Mary Lovett. The flowers of purest white, full and splendidly formed, are held on long strong stems and are delightfully fragrant—an unusual property in a climbing Rose. It is a hybrid of the popular Kaiserin Augusta Victoria and the Wichuraiana and is a strong grower with abundant, large, glossy, mildew-proof leafage and is exceedingly free flowering. 2-year size, 60 cts. each; by express.

The buds are long and pointed and they expand into an intensely fragrant, beautiful flower of large size. Splendid plants, \$2 each, by express.

RED BABY RAMBLER (Madame Norbert Levassieur). Grows 18 to 24 inches. Flowers are borne in clusters of 20, 30 or more, resembling the climbing Crimson Rambler. This Rose blooms continuously from June till frost, making it very desirable for edging walks, etc. A solid bed of this variety makes a bright show the entire growing season. Perfectly hardy.

WHITE BABY RAMBLER. A very suitable variety for cemetery planting as it is quite hardy, compact, and shapely in growth and blooms continuously. Each branch bears from 15 to 40 little creamy white flowers. It is used in quantity for edging Rose-beds.

YELLOW BABY RAMBLER. (See George Elger.)

BEAUTY OF ROSEMAWR. Makes a strong, handsome bush, and blooms all the time; the flowers are large, delightfully fragrant and perfectly double, with fine, overlapping petals and raised center; color a lovely shade of rich carmine-rose, finely veined with creamy white.

DUCHESSE DE BRABANT. Clear pink; beautiful, free bloomer; makes splendid buds and large, double, fragrant flowers; excellent for bedding; a great favorite at the White House, Washington.

DUCHESS OF ALBANY (Red La France). Closely resembles La France, but much deeper in color; the flowers are very double and full and deliciously sweet; color lovely rose-pink, very deep and exquisitely shaded.

ECARLATE. A superb and distinct novelty with color an extremely brilliant scarlet. It is a robust grower with medium-size semi-double blooms, which are produced continuously. It blooms the earliest and produces three times as many blooms as any other Hybrid Tea Rose in this color.

FREIHERR VON MARSCHALL.

Dark carmine; buds long and pointed; flowers large, full, and of perfect imbricated form. Free in bloom and satisfactory.

GEORGE ELGER. New. Petite buds and blooms of real yellow. The finest yellow Rose in the "Baby Rambler" class, producing quantities of flowers the entire season. Excellent for bordering.

Double Herbaceous Peonies

ARISTOCRATS OF
THE GARDEN FLOWERS

Mr. J. Eliot Coit, of Cornell University, in a Monograph on Peonies, gives seven most excellent points for their popularity, as follows:

1. They are easy to grow; anyone can raise glorious Peonies with less trouble than it takes to grow roses.
2. Peonies well established are permanent features in the garden, or at least as permanent as is desirable.
3. Peonies are perfectly hardy wherever apples can be grown, passing through the most severe winters without injury, and very easily protected where not hardy.
4. The blooms are large, showy, of various forms and of all shades of color from white to purple, and even pale yellow.
5. Many of the new varieties are deliciously fragrant.
6. They are practically free from insects and disease. No spraying, dusting, or hand-picking of worms is necessary.
7. They are equally successful as cut-flowers and for artistic landscape effect.

SIZE OF OUR ROOTS

We have two sizes: One-year roots which have been in the ground for at least one year; and

Two-year roots which have been in the ground two years or longer.

In each of the above cases the roots have an ample number of eyes.

Seven Choicest Peonies

If you know Peonies, you know that these are among the finest to be had. In this collection you get, not only the choicest varieties, but an extended season of bloom and every principal color represented. Every Hyacinth bulb we send out *has the blossom already formed inside it*. By regulating the culture (see directions with each order) you can have a beautiful display of bloom for Christmas or other special occasions. Hyacinths remain beautiful a long time and are splendid for table, window, or mantel decoration. Beds on the lawn in the early spring are exquisite. Plant now.

The figures, 1, 2, 3 and 4 after the name of the Hyacinth indicate the relative time of flowering—the 1's flower together and are the earliest; the 4's the latest.

The Definition of a Bulb

A bulb is really an entire blooming plant telescoped into a convenient package where it will not grow until given certain favorable conditions. Furthermore, inside of the bulb are many thickened scales which contain enough stored food to develop the blooms. Because of this nourishment, such bulbs as Hyacinths, Paper-white Narcissi, and Chinese Sacred Lilies may be grown in water if desired, the water containing practically no plant food. The whole growing series is supported by food in storage.—From the *Florists' Exchange*, December 11, 1915.

Hyacinths in Separate Colors

Our Fine Selected Hyacinths in Separate Colors are good-size, well-matured bulbs, sold at low prices and specially recommended for **bedding** and also for **winter blooming** in the conservatory and window-garden, when the higher-priced kinds are not desired. They give excellent satisfaction.

We have given these Hyacinths a thorough trial in our proving beds year after year, and we find by experience that for outside planting the best results are obtained from the single varieties, as the spikes are always clothed with well-formed florets and are generally larger than the double varieties. As many of our customers prefer the double flowers, we offer first-class, well-matured bulbs of both kinds.

How to Grow Beautiful Hyacinths

In the Open Ground

Plant in the fall, 6 inches apart each way and 3 to 4 inches deep. Give them slight protection over winter, and in the spring, after the flowers are gone, the bulbs may be removed in time to set your summer-flowering plants.

In Pots or Window-Boxes

Plant the bulb in the pot so that its crown just shows, then set away in a cool, dark place for six weeks or two months for root-growth to develop. After this, bring gradually to the light, heat and air; give plenty of water.

In Glasses

Set the bulb so that the lower end merely touches the water. Put away in a cool, dark place till the roots nearly touch the bottom of the glass, then remove gradually to the light and keep the water cool always.

Early-Flowering Roman Hyacinths

ROMAN HYACINTHS are very desirable for winter flowering in the house and begin to bloom very quickly. The Bulbs are hardy and can be planted in the open ground if given slight protection. The delicious perfume and profusion of bloom have made these Hyacinths very popular.

Price, 6 cts. each, 15 cts. for 3, 50 cts. per doz., \$4 per 100, postpaid.

On account of unsettled conditions in Europe the crop of Roman Hyacinths is likely to be short and the bulbs smaller than usual. We wish, however, to assure our customers that we will supply the best bulbs obtainable.

Single White Early. Early and profuse bloomer; very beautiful and sweet.

Single Blush-White. Rich creamy white, elegantly tinted with rosy blush.

Single Light Blue. A most charming color; early and profuse bloomer; very sweet.

Double Pink. Splendid new variety; beautiful, large flowers in handsome, well-filled spikes.

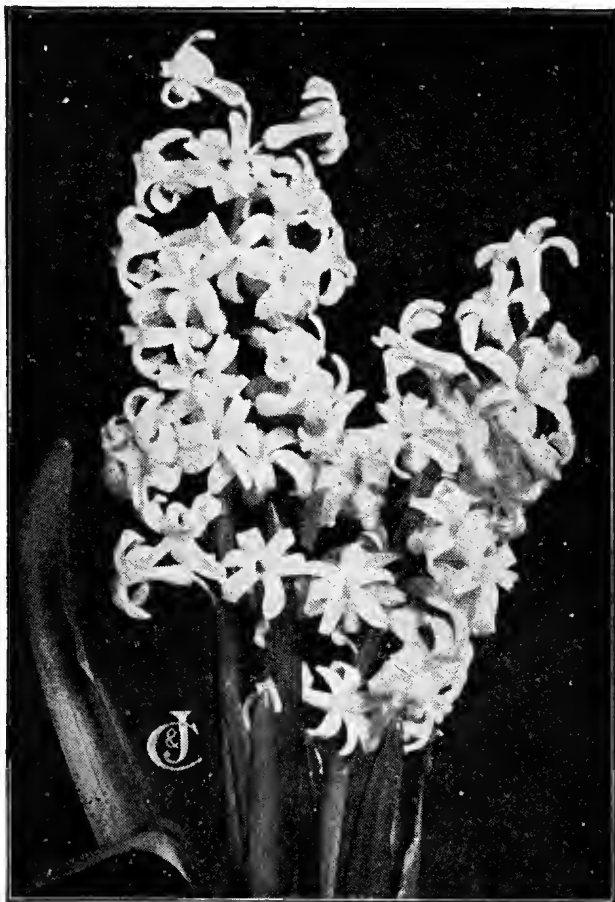

Single Canary-Yellow. New and very beautiful. Stock limited.

WHITE ITALIAN or PARISIAN HYACINTHS. These produce larger flowers and are somewhat later than the Roman Hyacinths. Highly valued for forcing for cut-flowers. Abundant in bloom and delightfully sweet. *These are sold subject to receipt from abroad.*

OFFER 21 Complete set of 5 named Roman Hyacinths, and 1 White Italian, offered above, 6 in all, only 30 cts., or 2 sets, 12 in all, for 50 cts., postpaid.

For three years I have grown the famous White Italian Hyacinth, and when in bloom my home is a dream of beauty and sweet fragrance. To me this is one of the most cherished of all flowers.—Mrs. J. C., Campbellsburg, Kentucky.

Gentlemen: I bought of you last fall Hyacinths for forcing. Each one sent up two large stalks of beautiful bloom, which amazed us. They were the most satisfactory plants I ever had.—Mrs. J. S. T., Skillman, New Jersey.

Plant in a pot or box which is at least 6 inches deep and well drained; good, turfy soil with a little old, well-rotted manure is best; the bulb should be covered about 1 inch deep; firm the earth well around it, water thoroughly and set away in a cool place three weeks or more till the roots begin to start, then bring to the light—the window of an ordinary living-room is about right. They require moderate heat, with plenty of sunshine and water, and should bloom about three months from time of planting. We offer three sizes. Ready in August.

Illinois Self-Watering Flower-Boxes

TRY THEM THIS WINTER FOR YOUR WINDOWS—GUARANTEED NOT TO LEAK

The boxes are made of heavy galvanized iron, which is painted an attractive green, and are provided with a self-watering device which renders attention unnecessary, except at intervals of from ten to twenty days. Through the tube in the corner water is poured into the reservoir (e) underneath the false bottom (d) which supports the soil (b).

Sponges (cc) touch the extreme bottom of box and extend upward into the soil in which the flowers are planted, thus supplying water by sub-irrigation.

Patented Jan. 29, 1907; June 22, 1909

Careful trials have proved that plants treated this way thrive much better, blooms will be larger and foliage heavier than in ordinary surface-watered boxes. Makes a splendid Christmas present.
